# Additional Material Safety Data Sheet Information NOTICE

The Fabrication (Drilling, Sanding, Milling, Etc.) of Fiberglass Reinforced Polyester Molded Sheets and Shapes.

The American Conference of Governmental Industrial Hygienists (ACGIH) has established threshold limit values (TLV) of 5.0 milligrams per cubic meter mg/m3 for workers exposure to nuisance dust. Threshold limit values refer to airborne concentrations of substances and represent conditions under which it is believed that nearly all workers may be repeatedly exposed day after day without adverse health effects. (Reference: OSHA Standard 29CFR Part 1910, Subpart Z).

#### A. Normal Use

During fabrication, this process may generate respirable nuisance dust, the TLV/PEL is 5mg/m3. (Reference: OSHA Standard 29CFR Part 1910, Subpart Z).

## B. Special Protection Information

- Respiratory Protection
   Avoid breathing dust. Use a dust respirator in compliance with OSHA Standard currently 29CFR1910.134.
- Ventilation Protection
   Local exhaust Follow OSHA Standard 29CFR1910.94.
- 3. Protective Gloves recommended.
- 4. Eye Protection Goggles/Face Shield recommended.
- 5. Other Protective Equipment
  Wear long sleeves, loose fitting clothing when machining or handling in a manner that
  liberates loose dust.
