1 Cabinets

Panorama cabinets from Hamilton Laboratory Solutions are designed exclusively for use in laboratory settings. They are constructed of powder coated steel and pass stringent industry testing to ensure product quality and performance will last for years to come. Cabinets are available in a variety of dimensions, colors and configurations so you are sure to find the right fit for your lab.

Base Units

- Flush overlay / inset steel
- Soft closed drawer slides
- Available with optional removable service access panel
- 18 standard powder coat SEFA approved colors
- Standard without locks

Base Combo Units:
15", 18", 21", 24", 30", 36", 42", 48"

2 Fume Hoods

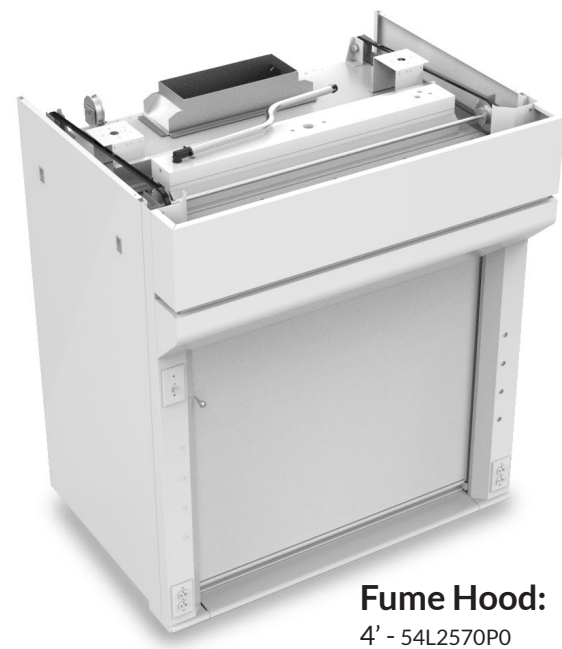

The Concept Fume Hood from Hamilton Laboratory Solutions offers the reliability and safety your lab required. Built to the highest industry standards, this unit will perform for years to come.

Fume Hoods

- Viewing height - viewable face opening is 35" (889 mm) high for optimum visibility of interior
- AutoSash (passive positioning system)
- Frameless vertical rising sash is standard
- Low profile sill airfoil
- Chain and sprocket sash counterbalance system features alignment shaft and sash leveling system
- Preset fixed baffle system - no adjustment required

- Designed for 60-100 feet per minute face velocities Downdraft bypass
- White polyresin asbestos-free lining - side wall access panels with PVC gasket
- Two-tube fluorescent light fixture, light switch, and two duplex 120 volt electrical receptacles
- Pre-wired fume hoods include plugged holes for future fixture on both posts

Right Ceiling Enclosure:

- Use to enclose space at right side of Concept between lower right side panel ceiling
- Requires front ceiling and sash enclosure panels

Left Ceiling Enclosure:

- Use to enclose space at left side of Concept between lower left side panel and ceiling
- Requires front ceiling and sash enclosure panels

Duct Transitions:

- Metal ductwork connection for fume hood exhaust, supply system to building exhaust, or supply system
- Stainless steel exhaust transition (rectangular to round duct)

Front Ceiling & Sash Enclosure Panels:

- Use to enclose space between front top and ceiling of Concept superstructure, also provides enclosure for raised sash

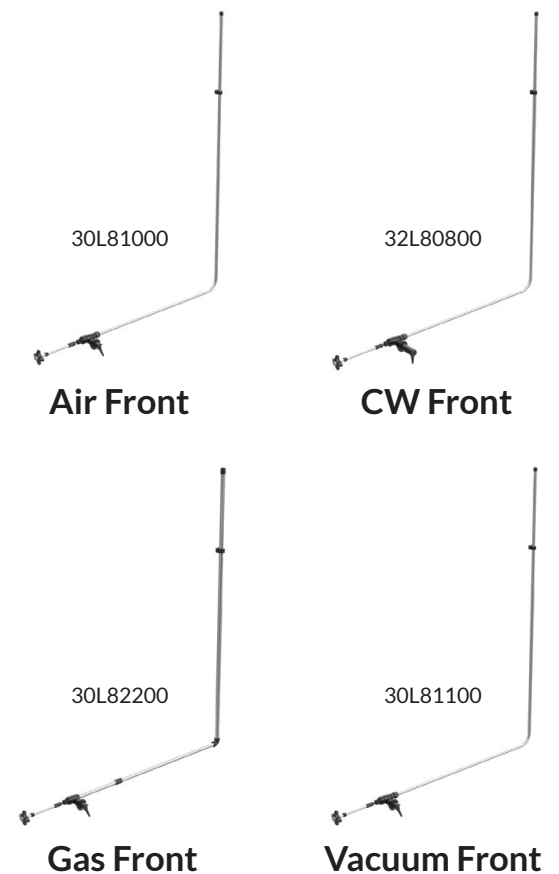

Pre-Piped Fixture Options:

- Pre-piped fixtures ship attached to the fume hood
- All piping configurations listed comply with the following national plumbing codes:
 - * SPC - Standard Plumbing Code
 - * NPC - National Plumbing Code
 - * UPC - Uniform Plumbing Code
 - * NSPC - National Standard Plumbing Code
- Type "L" copper pipe joints are either soldered with 95/5 solder or are mechanically attached with compression fittings
- Front-loaded service fixtures are not available in standard pre-piped configurations

3 Epoxy Resin Surfaces

A strong work surface is integral to any lab and the Epoxy Resin Surfaces provide durability and excellent resistance to a wide range of acids, solvent, and alkalis. Specific for areas requiring heat and chemical resistance.

Epoxy Resin Surfaces

- Durable, extremely hard surface
- Low sheen black finish
- Provides easy clean up
- Resists bacteria, heat, moisture and a wide range of chemicals
